SUMMARY

Versatile Front-End Developer with experience in designing, developing and deploying web applications with frameworks like Python Django and React JS by collaborating with UI/UX teams. I describe myself as a passionate developer proficient in Data Structures and Algorithms who loves building responsive web apps and keeping myself updated with the latest trends and technologies in the field.

PROFESSIONAL EXPERIENCE

Web Developer

Trisquare Engineering Services | 2022 - 23

- Designed and developed a job hunt platform based on React JS, integrating Google Firebase.
- Optimized components for maximum performance across a vast array of web-capable devices and browsers.
- Built reusable components and translated designs into high-quality code.
- Designed and developed React.JS, HTML5, CSS3, and JavaScript that meets accessibility and web browser standards for website.

PROJECTS

Ecommerce Application

[loomix-rentals.netlify.app](#)

React JS | Python Django

- Employed chart.js for displaying statistical data
- Utilized Twilio to send SMS over SMTP
- Implemented React components for streamlined state management and leveraged various performance-enhancing libraries, ensuring optimal functionality and user experience in the web application. Utilized React Hooks extensively to streamline state management and lifecycle behaviour, resulting in more modular and efficient code across the application.
- Utilized PostgreSQL DBMS for enhanced data management, making use of SQL skills
- Deployed the production-ready application on AWS EC2

SKILLS

- React JS
- Python Django
- SQL
- NoSQL
- Python
- MongoDB
- JavaScript
- Typescript
- Data Structures And Algorithms

LANGUAGE SKILLS

- English
- Malayalam
