MUHAMMED SHAHID

Phone: +91 8089851572 | E-Mail: shahid04m@gmail.com | www.linkedin.com/in/shahid04m

Full-stack web developer with experience in designing, developing and deploying web applications with frameworks like Python Django and React JS. Proficient in both frontend and backend technologies, I thrive on solving complex problems and delivering impactful results. My diverse experience in modern frameworks, as well as my expertise in Database Management Systems, makes me well-suited for a role where I can innovate and contribute to business growth.

PROFESSIONAL EXPERIENCE

Aboo Inc   2023 – Present
Fullstack Developer

- Expanded the functionality of the aircraft fueling and maintenance app by adding new features, working closely with cross-functional teams to gather requirements and prioritize development.
- Successfully integrated task automation features into the app, enhancing efficiency in aircraft fueling processes and reducing turnaround times by streamlining operations and improving task allocation.
- Architected and implemented user-friendly features utilizing Python scripting and JavaScript; optimized user experience by 50% through intuitive navigation, dynamic content loading, and real-time data visualization.
- Administered the application through cPanel.

Trisquare Engineering Services   2022 –2023
Frontend Developer

- Designed and developed a job-hunting platform based on React JS, integrating Google Firebase.
- Optimized components for maximum performance across a vast array of web-capable devices and browsers.
- Crafted an interactive, responsive web app using React JS for UI and state management. The app leverages Bootstrap's grid system to seamlessly adapt to various devices, ensuring a smooth user experience across platforms.
- Incorporated Firebase for real-time database functionalities and authentication.

PROJECTS

Ecommerce Application

- Engineered an E-commerce web application using React JS and Python Django.
- Employed chart.js for displaying statistical data.
- Took advantage of Twilio to send SMS over SMTP.
- Utilized PostgreSQL DBMS for enhanced data management, making use of SQL skills.
- Made use of React JS for streamlined state management and leveraged various performance-enhancing libraries, ensuring optimal functionality and user experience in the web application.
- Deployed the production-ready application on Amazon Web Service (AWS) EC2.

EDUCATION

IGNOU   Present
Course: Bachelor of Computer Applications

SKILLS

- React JS
- Next JS
- Redux

- Python Django
- PostgreSQL
- MongoDB

- TypeScript
- JavaScript
- Git

LANGUAGES

- English
- Malayalam
